

# X-TRONG®

The perfect bond

## Wood solutions

### 5000 BRUSH GRADE

High performance

Brush grade

High strength bonds

General purpose contact cement for brush and roller application. For bonding decorative laminates in the wood industry. Adequate to bond foams and synthetic fabrics in upholstery.

### 5001 BRUSH GRADE

NEW!

Good bond strength

Easy to spread

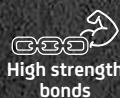

Professional use

For postforming, edgebanding, upholstery, and decorative laminates process in wood industry. Recommended to adhere MDF, high pressure laminates (HPL), wood veneers, polyurethane foam, stainless steel, textiles, leather, and rubber among others. Easy to apply by brush, roller, or trowel.

### 6000 MULTIPURPOSE

NEW!

High strength bonds

Fast drying

Good temperature resistance

Multipurpose Contact cement for bonding decorative laminates, wood, melamine, ABS and PVC veneers to wood, plywood, particle board and metal. Adequate to adhere foam to foam and foam to PVC synthetic fabrics in upholstery. It is recommended for the adhesion of different substrates and for footwear to repair shoes, boots, heels, soles. It might adhere materials like leather, PVC, textiles, some synthetic rubbers, polyurethane, and EVA. Spray or brush application.

# Wood solutions

## 8000 POSTFORMING

Spray grade

Permanent bonds

High temperature resistance

Fast drying

For applications in wood industry. Adequate for post-forming and flatworks with wood, HPL (Formica ®), melamine, ABS, PVC, and metal.

## 9000 FLATWORK

Permanent bond

Spray grade

Fast drying

Specially formulated for flatworks in the wood industry, decorative laminates, HPL (Formica ®), melamine, ABS, PVC and metal.

## CARPENTER'S GLUE

useful for wood with moisture content

High bond strength

Easy and safe to use

Multi-purpose product for joining wood with high tension and compression forces resistance.

## EXTREME FORCE ADHESIVE

Moisture resistance

High performance

Multipurpose

PU based moisture-curing adhesive providing xtreme bonding for a wide range of materials.

## Footwear solutions

**NEW!** **PU ADHESIVE.**

- Good adhesion
- Easy to apply
- Good coverage

Solvent Based Polyurethane adhesive for bonding different substrates. Specially recommended to adhere sole to upper in footwear industry with materials like PVC, polyurethane, EVA, rubber, leather and textiles.

## Building solutions

### BONDING AGENT

- Fast drying
- Re-emulsifiable
- Permanent adhesion to cement and concrete

Aqueous homopolymer dispersion designed as a bonding agent for application of the render, cement, screed or plaster to old concrete without a previous mechanical preparation.

## Pipe Solutions

### PVC CEMENT

Product Ideal for joining PVC pipelines and fittings

- All purpose, even Potable water
- Durable joints
- Fast Setting

### CPVC CEMENT

This product is adequate for strength bonds of pipelines and fittings.

- All purpose, even Potable water
- Indicated for hot water systems
- Fast Setting

### CLEAR CLEANER PVC - CPVC

All-purpose cleaning agent adequate to remove grime and smears on PVC or CPVC pipe and fittings.

- Fast drying

- Ready to use
